Beyond Strategic Planning: Building Capacity for Long-Term Sustainability

Steven C. Habeeb, AIA, LEED AP
President
Habeeb & Associates
Norwell, MA

Tamara L. Macuch
Vice President
Habeeb & Associates
Norwell, MA

This session shows you the path to financial sustainability through the Master Planning Process. The Process generates user-based recommendations that create alignment between facilities, educational program and vision. The Process engages the entire school community to renew excitement, re-establish communication and connections, revitalize staff and establish a solid path forward for the school. It generates a path that all are in agreement with, strategically and with financial support.

The session challenges participants to lead with Holy Boldness and to engage in the Master Planning Process that creates school sustainability. The definition of Catholic School Sustainability as created through the Master Planning Process: 1. Complete confidence in the current and future (endowment) financial resources. 2. Resources that fully support the culture, educational program, facilities and vision for the future. 3. Reliable enrollment that is resilient through shifts in the social and economic strains of the nation.

Dramatic Shift in Employee Expectations and Needs Since March 2020: How Can Benefits be Tailored to Meet these Changing Needs?

Four Key Growth and Sustainability Recommendations for LASSCA Leaders

Dr. Harry Bloom
Senior Vice President, Client Solutions
Measuring Success
Washington, DC

Daniel Chiat
Senior Vice President
Measuring Success
Washington, DC

Having recently partnered with about a dozen LASSCA schools in applying data science and research to address the need for enhanced enrollment and financial sustainability issues, Measuring Success has identified four strategies that have the potential to significantly strengthen LASSCA schools. Join Measuring Success' senior consultants to discuss these strategies and their relevance to your school in an interactive session.
